

HSRA Quality Policy

The Hazardous Substances Regulatory Authority (HSRA) is committed to providing quality service in authorization, inspection and enforcement activities consistent with the provisions of the Nuclear Safety and Radiation Protection Act, 2015 and the attendant Regulations. Our strategic direction seeks to enhance protection of people, property and the environment, from the harmful effects of ionizing radiation, whilst creating a high level of safety and security that facilitates beneficial and peaceful use of nuclear technology.

We believe that sound operating practices and the use of competent and certified professionals contribute to our strength and provide benefit to our stakeholders. We commit to work consistently to meet customers' needs and satisfaction through continual improvement of our quality management system and conforming to applicable statutory and regulatory requirements.

The HSRA is committed to ensuring impartiality in the conduct of all its activities and maintaining confidentiality in our dealings with all interested parties. It is our policy to manage this through enforceable agreements with all players and to safeguard all information obtained or created during our activities.

It is our commitment to communicate and reinforce this quality policy throughout the HSRA and to all external stakeholders.

Dr. Cliff Riley

Director General, HSRA
